

**MAXLIGHT**

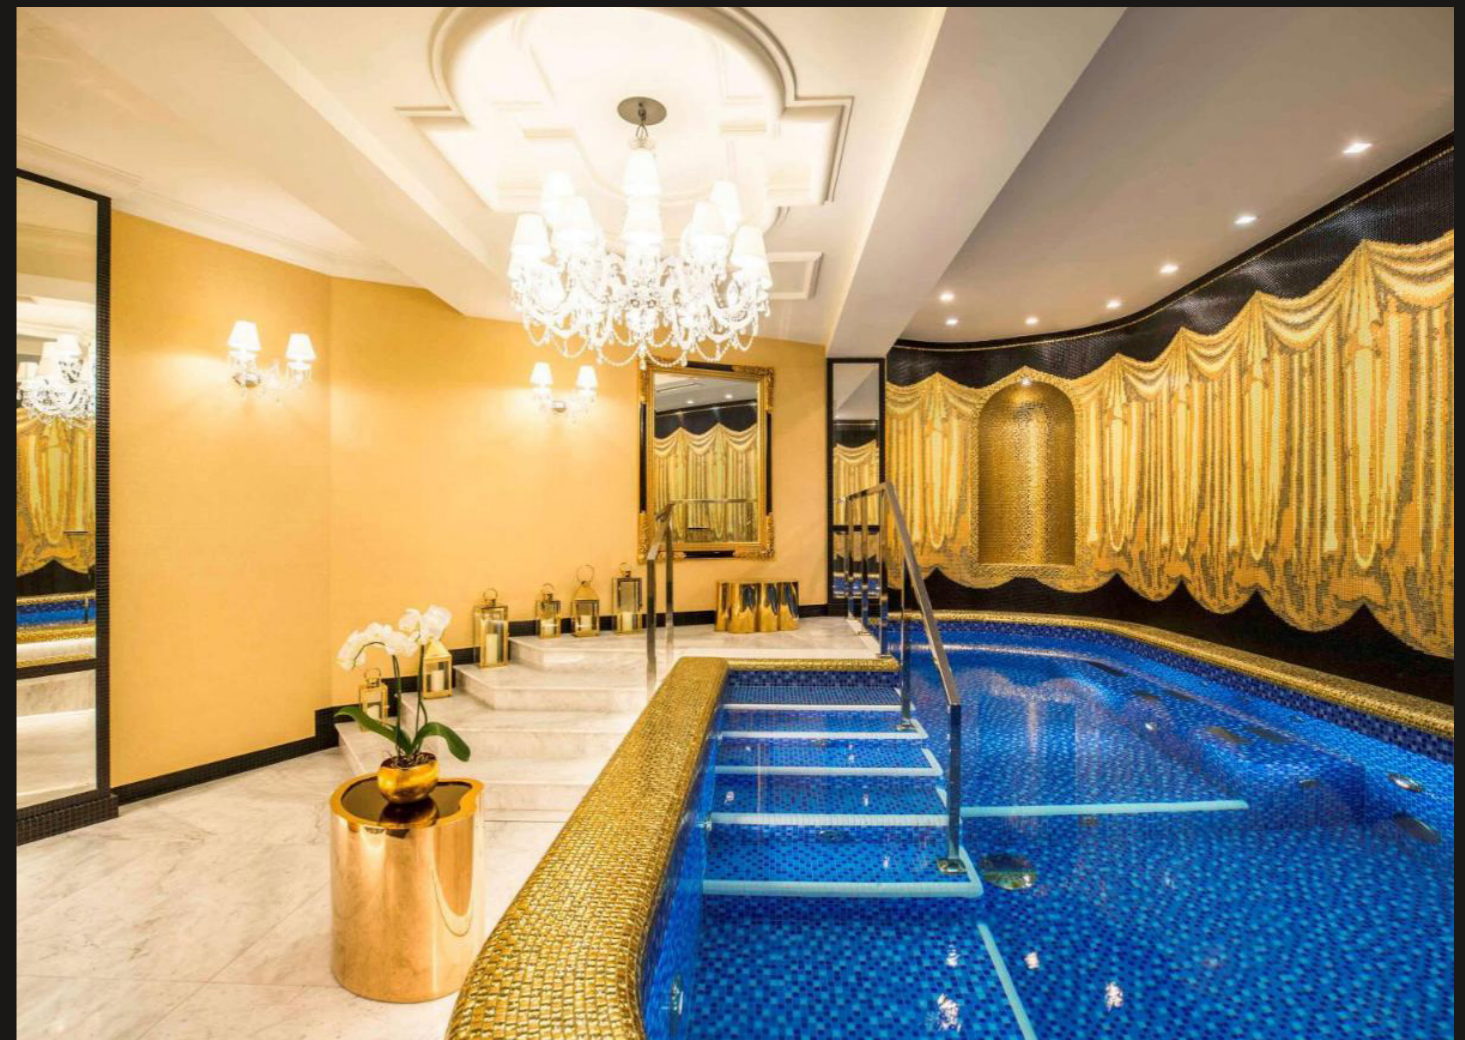

Maxlight is a brand that has been present in the industry for over 14 years, consistently growing year after year. However, our journey began long before that. We are part of the renowned Krakow-based family company Maxfliz, which has been creating exceptional interiors using the finest global design for over 30 years.

Our extensive experience in the industry, coupled with attending the most important European trade shows and keeping a keen eye on trends, have given us a deep understanding of the industry. It has led us to the realization that it's time to explore our own projects and create a niche for ourselves. So, in 2018, we took the leap and started building our own design department.

We have built strong partnerships with our partners, and we ensure that every product we bring to the market meets our high standards of quality and sustainability.

At Maxlight, we understand that design is not just about creating beautiful products. It's about creating products that are functional, sustainable, and have a positive impact on the world around us. We believe that design has the power to change the world, and we are committed to doing our part in creating a better future.

As we continue on our journey, we are excited to explore new avenues and push the boundaries of design. We believe that the best is yet to come, and we are committed to bringing innovative and sustainable design solutions to the market. At Maxlight, we are not just building a brand; we are building a legacy that will stand the test of time.

The background features a complex geometric composition of overlapping, angular planes. The primary colors are a rich, metallic gold and a deep, solid black. The gold surfaces have a fine, brushed texture and catch the light, creating bright highlights and soft shadows that define the three-dimensional structure. The black areas provide a stark contrast, highlighting the edges and forms of the gold planes. The overall effect is one of modern, architectural elegance.
